Tracing Gold from the Mine to the Vault

1

IPMB is the First Vertically Integrated Gold Tokenization Project.

2

Transforming Gold into a positive carry asset for the first time in history, **how?**

- By waiving fees on storage and insurance for the first 3 years.
- By converting GPROs to GEM NFTs (a promissory note for physical delivery of LBMA 24ct investment-grade gold) with a discount.
- By providing a hedge against inflation and fiat currency devaluation on the smart contract level.

Follow your Gold's Journey with GoldTrace360

Phase 1

Sourcing of Gold Doré bars. Ethical sourcing of gold from co-owned mining facilities, tracked in real-time via GoldTrace360.

Phase 2

Smelting unprocessed Gold nuggets into 1kg bars of 22ct purity or better.

Phase 3

Verified Proof of Reserves through an AUP report by Grant Thornton.

Phase 4

1 GPRO is backed by at least 1 gram of 22ct gold doré, meaning there is real, verifiable gold backing the token.

Phase 5.1

Utility: Payments & Discounts

GPROs can be used as a means of Payment in the IPMB Ecosystem and can unlock discounts.

Phase 5.2

Refining: LBMA - Certification

Refining to LBMA-certified Investment-Grade Gold.

Phase 6

Utility: GPRO Conversion

- **Phase 6.1** — Staking-Based Conversion: Stake GPRO holding and unlock discounts of up to 11% on GEM NFTs when converting.
- **Phase 6.2** — Instant Buy Conversion: Instant conversion, a market-rate swap from GPRO to GEM NFTs.

Phase 7

GEM NFTs:
Non-Fungible Tokens, pegged to the gold price.
